8. Always charge this product before extended storage.

Appearance & Interface Description:

- 1 Ring/Silent Switch
- 2 Volume Buttons
- 3 Battery Level Indicator Button (Push button to check level of battery remaining)
- 4 Battery level LED indicator
- 5 Power on/off switch
- 6 Headphone output
- 7 Micro - USB Charging Input

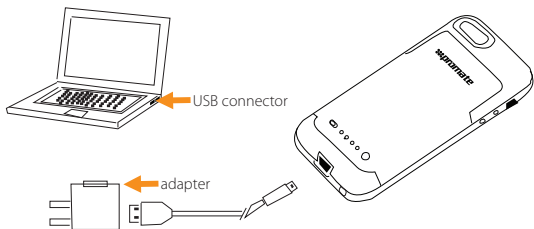

Operation Instructions:

1. Charging Force.i5 without iPhone 5/5s connected

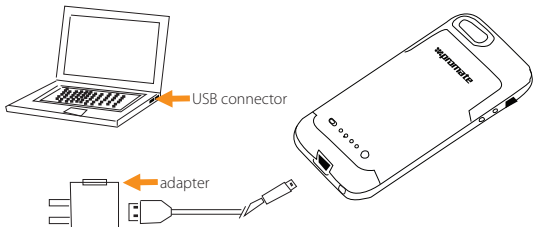

Kindly use the original micro-USB cable provided to charge your Force.i5. Connect the charging cable to the Force.i5 USB input interface and the other end to a power adapter or computer USB port. The LED light starts flashing to indicate the level of charge. When all the four LEDs light up, Force.i5 is fully charged. The whole charging process takes around 4 hours.

2. Charging iPhone 5/5s using Force.i5

Connect your iPhone into the external rechargeable battery aligning the pins on the iPhone with the pins on Force.i5. Flip the power switch to the "on" position to begin charging of your iPhone using Force.i5. Once charging is complete flip the switch to the "off" position to stop charging. You can view the amount of power left in the battery pressing and holding the battery level indicator button.

3. Charging Force.i5 with iPhone 5/5s connected:

Connect your iPhone 5/5s to Force.i5 and then connect the provided micro-USB charging cable to the charging port at the bottom of Force.i5. Connect another end of the micro-USB charging cable to a power adapter or computer USB port. Your iPhone will now start charging. When your iPhone 5/5s is fully charged, the backup battery in Force.i5 automatically starts getting charged. During the charging process, the LEDs located on the bottom of the device will flash to indicate your device has begun charging. When all the four LEDs light up, Force.i5 is fully charged.
